Stock Market Tracker 📈

A desktop application built with **Tkinter**, **BeautifulSoup**, and **SQLite** to track global stock indices, search for stocks, and manage favorite stocks.

Features

- View **Global Indices** with real-time updates.

- Search for stocks by **code** or **name**.

- Add/Delete stocks to/from **Favorites**.

Requirements

- Python 3.x

- Libraries: requests, beautifulsoup4, sqlite3, matplotlib, tkinter

Usage

1. Clone the repository.

2. Install required libraries:

bash

Copy code

pip install -r requirements.txt

3. Run the application:

bash

Copy code

python main.py
